

INCIDENT INVESTIGATION DIFFERENTLY

WORKSHOP OVERVIEW

Our 2-day Blueline Investigation™ facilitation training provides participants with the skills and tools needed to facilitate a Blueline investigation. Topics covered in the training include:

- Principles of Safety Differently, Safety-I & Safety-II and HOP
- Immediate actions required after an incident
- Classifying an incident
- Identify and collect essential information of work as done and work as intended
- Improving the information provided by incident statements
- How to collect and use images to effectively communicate the event
- Conducting Re-enactments
- Collecting information where equipment failure is involved
- The role of the facilitator
- Scope and plan an investigation
- Identify and collect essential information about work as normal
- Generative questioning
- Analyse the information using the Blueline Investigation Methodology
- Identify systemic organisational issues
- Develop effective corrective actions
- Report to stakeholders

All training will include Local Government specific imagery, procedures/processes and examples. Each participant will be provided with:

- A copy of the course material.
- Templates for an Event Learning Report as well as an Incident Statement, Investigation Quality Checklist and Blueline Investigation Timeline.

Cost: \$275.00 per participant

only one participant per Council until numbers are finalised.

Please complete the Registration Form relevant to your location and return to your LGW WHS Consultant.
